

16th CII Manufacturing Summit 2017

"Re-Inventing Indian Manufacturing"

Monday, 27 November 2017, Taj Vivanta, Cuffe Parade, Mumbai

Program – Outline

0830 hrs – 1000 hrs **Registration**

1000 hrs – 1100 hrs **Inaugural Session – “Make For India”**

It has been over 3 years since the Make-In-India initiative was launched with considerable fanfare by the central government. Over the last three years, several changes have been made – FDI norms for key manufacturing sectors have been relaxed, labour laws have started improving, and there is a much higher orientation to move up on the 'Ease of Doing Business' scale. However, manufacturing has continued to be a lukewarm sector with IIP growth in the early single digits over the last few years. *Is “Make for India” the missing link?* Are we customizing our efforts enough to serve the Indian market? This is what the session seeks to explore. This session will feature industry leaders from various local and multinational corporations to share their view on the opportunity to serve Indian customers, rather than only use India as a manufacturing base.

Welcome & Introductory Remarks

Ninad Karpe, Chairman, CII (WR),
Director, Aptech Limited

The Summit & its Objectives

Jamshyd N Godrej, Summit Chairman & Past President, CII and
Chairman & Managing Director, Godrej & Boyce Mfg Co Ltd

Release of the CII – BCG Manufacturing Leadership Report

Overview of the Report

Dr Arindam Bhattacharya
Senior Partner & Director, BCG India

Inaugural Address by Chief Guest

Concluding Remarks by

Jamshyd N Godrej, Summit Chairman

1100 hrs - 1115 hrs **Inauguration of Immersion session / Exhibition**

1115 hrs - 1130 hrs **Networking Break**

**1130 hrs – 1230 hrs****Jugaad 4.0 vs Industry 4.0**

Industry 4.0 stands for the changes that are collectively being driven in manufacturing companies by 9 distinct trends. However, many of these changes have still not impacted Indian manufacturing in a major way as the economics of these technologies work very differently in India compared to other, more developed nations, given the different cost structures in India. With cutting corners and finding quick-fix solutions still being the norm in many companies, this session will explore what it means to adopt **Industry 4.0 in a low-cost, India-centric frugal innovation context**. This session will have practitioners from different manufacturing companies coming together to share their experiences of shop-floor level technology innovation.

1230hrs – 1330 hrs**Startups 4.0: India-centric technology innovations**

The summit will also feature a separate immersion session bringing together start-ups from various technology companies focusing on Industry 4.0 innovations to share their experiences. The objective is for the participants to get a real feel for the impact that technological advancements are creating in their industries, and consider applications of the same in their context. Is i40 being implemented across the value chain and the importance of the policy makers in supporting the industry by setting up proto type centers in each state of the country as a support.

1330 hrs - 1430 hrs**Networking Lunch****1430 hrs - 1450 hrs****Interface of Banking & Manufacturing : lessons learned, Plans for Future****1450hrs - 1550hrs****Exclusive Session: Implications of GST for an Integrated Manufacturing Sector**

Doing business will not be the same after GST implementation. The implications of the game-changing GST legislation are yet to be ascertained in their full complexity in the Indian scenario. How will transactions change? How will supply chains adapt? How will the hitherto 'unorganized' sector respond? This session will have a rich debate on the **opportunities and challenges that GST provides**, as well as a few lessons for companies from implementation of GST over 4+ months.

1550 hrs – 1650 hrs**Millennial MSMEs : Future Ready for Industry 4.0**

MSMEs continue to form heart of our manufacturing sector. They are likely to change their ways of working substantially in the days to come, with Industry 4.0 innovations, with GST implementation, with better infrastructure and better global connectedness. How will the face of the new MSME sector look like in the India of 2025? This session will have a variety of practitioners serving and operating in the MSME sector share their views on this topic. What are the policy derivatives, Excuse of automation is not low labour productivity. How can the labours be secured.

1650hrs – 1700hrs Networking Tea / Coffee break

1700 hrs – 1800 hrs Ease of Doing Business: The Road Ahead

In many ways the landscape of doing business in India is changing dramatically. The Central and State governments have announced a variety of initiatives to improve ease of doing business. However, while investments have increased overall as indicated by FDI inflows, it is clear that there are still many roadblocks to realizing the vision of a truly seamless, conducive environment for doing business. This session therefore looks to understand the improvements that have taken place as well as have a meaningful debate on the challenges that hold India back still. What else can India do to make the business environment more attractive? What role can technology play? How can the capital cost be reduced? To compete globally, how can the interest rate on capital be reduced

1800 hrs–1815 hrs Presentation on : My Vision, My Company

1815 hrs–1830 hrs Industry 4.0 Exhibition and Contest

Case Study Presentation & Felicitation

1830 hrs–1845 hrs Valedictory Session

Mr. Arun Maira

Former member of Planning Commission of India &

Former India Chairman of Boston Consulting Group

Mr Jamshyd N Godrej,

Summit Chairman & Past President, CII and

Chairman & Managing Director, Godrej & Boyce Mfg Co Ltd

End of Summit
